LIFE IS PRECIOUS

Continuous glucose insights for 16 Days

16
16-Day Wear

8.58% MARD

Readings every 3 minutes

45-minute warm-up time

A compact CGM system designed for continuous monitoring, everyday wear and reliable glucose insights.

Bluetooth connectivity
Real-time data transmission to the Tracky Health App.

30–500 mg/dL
Wide glucose measurement range.

IP58
Designed for practical everyday wear with water resistance.

Use profile
Above 18yrs of age

One small sensor. 16 days of continuous visibility.

16D CGM

tracky
LIFE IS PRECIOUS

Engineered for Effortless, Connected Glucose Monitoring

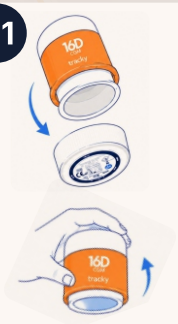

Applicator
Designed for effortless application with a compact, ergonomic snap-ring design.

16D Sensor
Compact, comfortable and reliable. Delivers glucose readings every 3 minutes for up to 16 days, with IP58 water resistance and Bluetooth connectivity.

Protective Cap
Tamper-proof and secure. Supports a smooth setup and reliable activation workflow.

Easy 3-Step Application

01

TWIST
Twist and remove the protective cap.

02

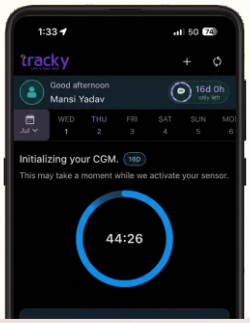

PUSH
Place on the skin and press to apply the sensor.

03

CONNECT
Scan the QR code to connect with Tracky Health App

Warm-Up
The sensor initializes for approximately 45 minutes.

Start Monitoring
Once initialization is complete, glucose readings begin updating every 3 minutes.

One small sensor. 16 days of continuous visibility.

LIFE IS PRECIOUS

Real-Time Glucose Insights with the Tracky Health App

Real-time readings, glucose trends, time in range and detailed reports provide a clear view of glucose patterns.

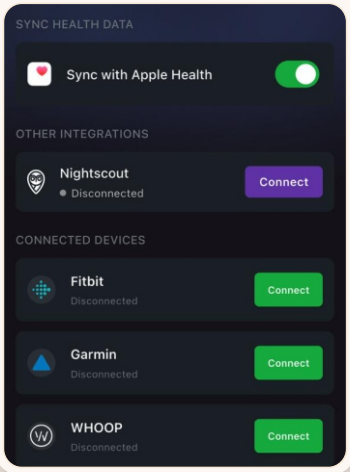

Glucose Now
View your latest glucose reading instantly.

Time in Range
HIPAA, GDPR compliance, and HL7 integration

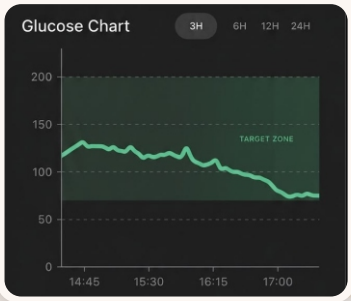

Smart Watches & Bands Integration
Connect with Google Fit
Connect with Apple Health

High & Low Insights
Spot highs, lows and glucose patterns.

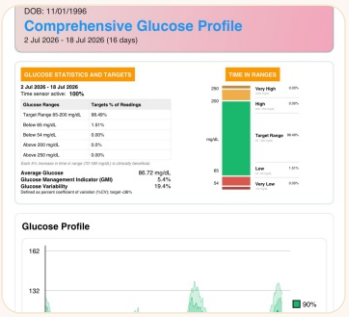

CERTIFIED

GDPR | HIPAA COMPLIANT | HL7 International

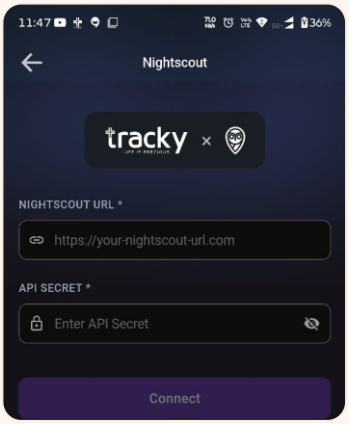

Dynamic Island
Latest glucose reading at a glance on compatible iPhones

Detailed Reports
AGP, CGP and detailed glucose reports

Nightscout
Remote access and glucose-data sharing

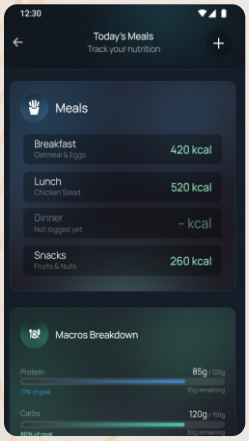

Tracky Health App | Real-time monitoring, trends and reports

LIFE IS PRECIOUS

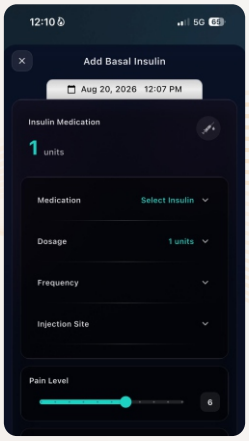

A Connected View of Glucose Data and Daily Routine

The Tracky Health App brings glucose readings together with meals, movement, medication and treatment information in one place.

Food

Log meals and connect them with post-meal glucose response.

Activity

Understand how movement and exercise influence glucose changes.

Medication

Log medication timing and review it alongside glucose changes

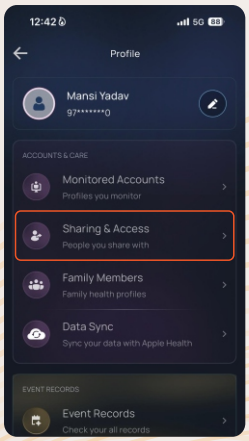

Insulin

Log insulin timing and review its relationship with glucose.

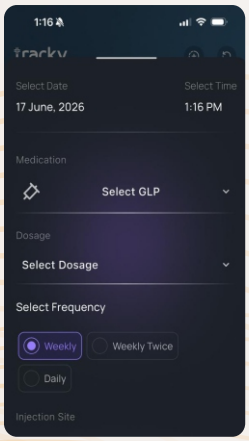

Share & Monitor

Share relevant glucose insights and reports with your care network.

GLP-1 Medication Log

Track doses, schedule and treatment journey alongside glucose trends.

Lifestyle and treatment context alongside glucose trends

16D CGM

LIFE IS PRECIOUS

Real-Time Patient Glucose Data for Informed Clinical Review

Continuous glucose intelligence for clearer reviews and better-informed care

Structured Reports
Clear, clinical and actionable.

Better Decisions
Insights that drive care.

Shared Visibility
The right information with the right people.

Complete Clinical Context
Glucose and lifestyle data in one view.

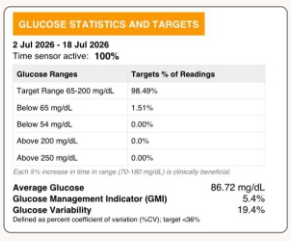

Real-Time Glucose Data
Live dashboard for patient data review.

Accurate & Reliable
8.58% MARD for clinician confidence.

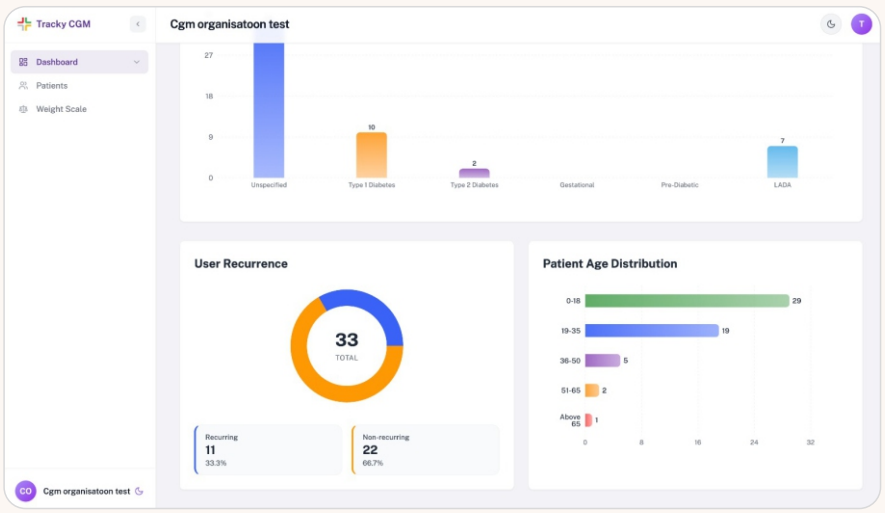

Seamless Sharing
Share reports securely

Nightscout Integration
Remote access for continuous support.

DOCTOR REVIEW DASHBOARD

One small sensor. 16 days of continuous visibility.

LIFE IS PRECIOUS

Clinically Proven Performance

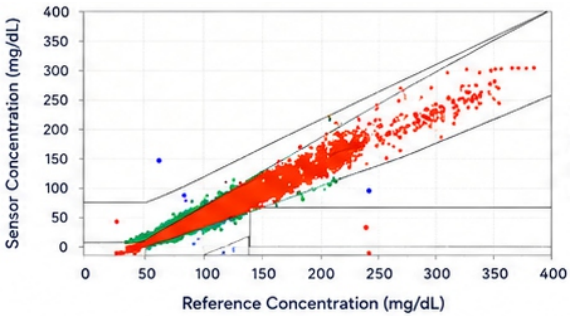

A multi-center, self-controlled clinical study compared the Tracky 16D CGM System with glucose readings from venous blood using the EKF-diagnostic GmbH analyzer. The study involved **72 adults with diabetes.**

Primary Outcomes	Results
Percentage of CGM readings within 20% of the reference values (agreement rate)	94.97%
The percentage of measuring points in zones A+B of Clarke error grid analysis	98.80%
The percentage of measuring points in the zones A+B of Consensus error grid analysis	99.99%
Mean Absolute Relative Difference (MARD%)	8.58%

CLARKE ERROR GRID ANALYSIS

CONSENSUS ERROR GRID ANALYSIS

High Accuracy
High agreement with reference lab results.

Clinical Confidence
Exceptional performance in Clarke & Consensus analyses.

Real-World Validation
Proven in a multi-center study with 72 diabetic patients.

Proven accuracy. Trusted results. Better care.

The Tracky Multi-Vital Monitoring Ecosystem

From Continuous Monitoring to Connected Clinical Review

Glucose Monitoring
Real-time readings, trends & insights

Heart Health
Heart rate, HRV & ECG insights

Body Composition
Understand your body better

Blood Pressure Monitor
Track BP trends with ease

Blood Oxygen
Track SpO_2 & pulse rate

Temperature
Quick & reliable readings
